

Testimony in Support of H.B. 6798
An Act Concerning GMO labels on Baby Food & Baby Formula

I am a resident of Hartford, Ct. I strongly urge you to support HB 6798, a bill to label GMO's found in baby food & baby formula. As a mother and now a grand mother, I want the healthiest food for all Connecticut children. I have grave reservations about the safety of GMO's. I know I would not choose genetically modified foods for myself. Testing has been done solely by companies that profit from GMO's. As a wellness advocate, I am also concerned about the herbicide used in large amounts to produce GMO's. Children with undeveloped immune systems will be adversely affected. This may lead to even greater health costs for our families. As a consumer, I want the right to know what products are genetically modified. Please support mandatory labeling of GMO's.

Thank you.
